Program Notes

Fried Egg

This collaborative piece merges digital sound processing (DSP), semi-modular synthesis, electric guitar, and live processed visuals to create an immersive, multimedia experience that blends live and pre-composed elements seamlessly.

Soy Bien EΛ2

A bold exploration of reactive and performative interactions, this work features custom-built MaxMSP patches, midi controllers, Nintendo Switch controllers, live audio processing and video. The result is a texturally rich and highly dynamic sonic landscape, balancing spontaneity and precision.

3 Chapters for a Phantom

This narrative explores themes of spectrality through spatial diffusion, live texture creation, dynamic audio effects, and the evocative sounds of the disklavier piano. Each chapter offers a unique perspective, weaving intricate sonic layers into a cohesive, otherworldly experience.

Quarters

This synchronized multimedia performance features live audio processing, intricate visual designs, and a collaborative approach to blending sound and imagery. The group's integration of live electronic instruments, software, and visuals creates a captivating, immersive experience.
